

Entry Level I Construction Training

Classes run Monday - Friday from 8:30 a.m. - 4:30 p.m.

Goodwill's six-week, 96-hour Entry Level 1 Construction Training program provides instruction in the areas of construction math, blueprint reading, hand and power tool use, along with safety training.

The course also provides training that includes 10-hour OSHA Construction Compliance, as well as providing training in the areas of "soft skills" needed for employment such as interviewing and resume writing. The curriculum uses the National Center for Construction Education and Research (NCCER) training format and provides certificates of competency knowledge.

Recommended workshops at Goodwill prior to entering this program

- Basic Computer Training
- Microsoft Word
- Resume

Prerequisites

- Personal interview at Job Resource Center
- TABE testing (7th grade level reading and math) in the Job Resource Center at the Goodwill Opportunity Campus

Intermediate Level II Construction Training

Classes run Tuesday and Thursday from 8:30 a.m. - 4:30 p.m.

There is an internship opportunity Monday, Wednesday and Friday. Goodwill's five-week, 80-hour Intermediate Level 2 Construction Training program provides instruction in the areas of drywall repair, doors and hardware, locks, windows and floors.

This course uses the National Center for Construction Education and Research (NCCER) training format and provides certificates of competency in basic construction knowledge.

Upon successful completion of this course, the student will:

- Possess a better understanding of installation process and some specific construction trades
- Have acquired hands-on application of their knowledge.
- Be prepared to enter into a specific construction trade area at an entry level position with work experience through internship opportunity.

Content

Doors and hardware: Installation of doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also covers the installation of wooden doors, folding doors and pocket doors.

Drywall: Describes the various types of gypsum drywall, their uses and the fastening devices and methods used to install them. Contains detailed instructions for installing drywall on walls and ceilings using nails, drywall screws and fastening trim to provide a professional finished appearance.

Window, Door, Floor and Ceiling Trim: Covers the different types of trim used in finish work. Focuses on the proper methods for selecting, cutting and fastening trim to provide a professional finished appearance.

Registration Deadline Orientation Class Begins Class Ends
